

access to rural and agricultural programming; and

Whereas multichannel video programming distributors and providers of digital and streaming media should make delivery of rural and agricultural programming, including agricultural news and western lifestyle content, a priority: Now, therefore, be it

Resolved, That the Senate recognizes the importance of rural and agricultural programming and the need for greater access to rural and agricultural media programming.

AUTHORITY FOR COMMITTEES TO MEET

Mr. VAN HOLLEN. Mr. President, I have four requests for committees to meet during today's session of the Senate. They have the approval of the Majority and Minority Leaders.

Pursuant to rule XXVI, paragraph 5(a), of the Standing Rules of the Senate, the following committees are authorized to meet during today's session of the Senate:

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

The Committee on Banking, Housing, and Urban Affairs is authorized to meet during the session of the Senate on Thursday, July 14, 2022, at 10 a.m., to conduct a hearing.

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

The Committee on Commerce, Science, and Transportation is authorized to meet during the session of the Senate on Thursday, July 14, 2022, at 10 a.m., to conduct a hearing.

COMMITTEE ON HOMELAND SECURITY AND GOVERNMENTAL AFFAIRS

The Committee on Homeland Security and Governmental Affairs is authorized to meet during the session of the Senate on Thursday, July 14, 2022, at 10:15 a.m., to conduct a hearing.

COMMITTEE ON THE JUDICIARY

The Committee on the Judiciary is authorized to meet during the session of the Senate on Thursday, July 14, 2022, at 9 a.m., to conduct an executive business meeting.

CONGRATULATING THE UNIVERSITY OF MISSISSIPPI REBELS BASEBALL TEAM FOR WINNING THE 2022 NATIONAL COLLEGIATE ATHLETIC ASSOCIATION DIVISION I BASEBALL CHAMPIONSHIP

Mr. VAN HOLLEN. Madam President, I ask unanimous consent that the Senate proceed to the consideration of S. Res. 710, submitted earlier today.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The senior assistant legislative clerk read as follows:

A resolution (S. Res. 710) congratulating the University of Mississippi Rebels baseball team for winning the 2022 National Collegiate Athletic Association Division I baseball championship.

There being no objection, the Senate proceeded to consider the resolution.

Mr. VAN HOLLEN. Madam President, I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, and the motions to reconsider be considered made and laid upon the table with no intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 710) was agreed to.

The preamble was agreed to.

(The resolution, with its preamble, is printed in today's RECORD under "Submitted Resolutions.")

EXPRESSING THE CONDOLENCES OF THE SENATE AND HONORING THE MEMORY OF THE VICTIMS OF THE MASS SHOOTING AT THE FOURTH OF JULY PARADE IN HIGHLAND PARK, ILLINOIS, ON JULY 4, 2022

Mr. VAN HOLLEN. Madam President, I ask unanimous consent that the Senate proceed to the consideration of S. Res. 711, submitted earlier today.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The senior assistant legislative clerk read as follows:

A resolution (S. Res. 711) expressing the condolences of the Senate and honoring the memory of the victims of the mass shooting at the Fourth of July parade in Highland Park, Illinois, on July 4, 2022.

There being no objection, the Senate proceeded to consider the resolution.

Mr. VAN HOLLEN. Madam President, I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, and the motions to reconsider be considered made and laid upon the table with no intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 711) was agreed to.

The preamble was agreed to.

(The resolution, with its preamble, is printed in today's RECORD under "Submitted Resolutions.")

ORDERS FOR MONDAY, JULY 18, 2022

Mr. VAN HOLLEN. Madam President, I ask unanimous consent that all postcloture time be considered expired on Executive Calendar No. 968 and the Senate vote on confirmation of the nomination at a time to be determined by the majority leader, or his designee, following consultation with the Republican leader; further, that when the Senate completes its business today, it adjourn until 3 p.m. on Monday, July 18; and that following the prayer and pledge, the morning hour be deemed expired, the Journal of proceedings be approved to date, the time for the two leaders be reserved for their use later in the day, and morning business be closed; that upon the conclusion of morning business, the Senate proceed

to executive session and resume consideration of Calendar No. 1035; and that cloture motions filed during today's session ripen at 5:30 p.m. on Monday.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. VAN HOLLEN. Madam President, finally, for the information of the Senate, the 5:30 p.m. vote will be on the motion to invoke cloture on the Wang nomination to be U.S. District Court Judge for the District of Colorado.

ORDER FOR ADJOURNMENT

Mr. VAN HOLLEN. Madam President, if there is no further business to come before the Senate, I ask unanimous consent that following the remarks of Senator SULLIVAN, the Senate stand adjourned under the previous order.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Alaska.

INFRASTRUCTURE

Mr. SULLIVAN. Madam President, I just had the opportunity to host a lunch—the Thursday lunch—for a number of my Senate colleagues. This is an opportunity that Senators get to essentially brag about their State. It is kind of like what I do with the "Alaskan of the Week" speech that I give.

I know we have new pages here.

I am going to be putting out a Facebook post on the incredible bounty that we just had at the lunch—salmon, halibut, peonies flowers, which are now growing in abundance in Alaska. It was a really, really incredible meal, if I do say so myself, from Alaskans. So we are going to talk about that.

Next week I will be back to my "Alaskan of the Week" series, for the new pages. I promise you, this is going to be your favorite speech of the week because it is interesting, and it tells stories, and it is exciting about what is going on in Alaska.

Madam President, I want to talk about two other issues today that I care deeply about—I think most Senators do, and certainly Americans do—and that is two things that our country desperately needs: infrastructure and energy. Infrastructure and energy—and we all know that this is what is needed.

We talk about it here a lot in the Senate. However, some, especially in the Biden administration, talk a lot about these issues but, then, when it comes to taking action, maybe not so much. Maybe that is starting to change, maybe not.

But I am going to talk about something I introduced in the Senate yesterday that is going to be action, especially on infrastructure. So let's talk about infrastructure first.

Yesterday, I introduced a joint resolution of disapproval under the Congressional Review Act—it is what we call the CRA—which will nullify the Biden administration's new regulations that are remarkably going to bog down

the ability to permit infrastructure projects. It is going to add to the red-tape that every single American who cares about this issue knows is a problem, and it is a new reg from the Biden administration—remarkably, because they supposedly are for infrastructure, and I am going to get to that. It is a new reg to make it harder to build infrastructure projects.

So let me unpack a little bit of that because it is something that I think all Americans care about. I know they care about it, but it can kind of be boring and technical, with permitting and things like that.

When the National Environmental Policy Act, NEPA, was passed in the late sixties, it required an environmental impact statement, an EIS, as we call these things. In the old days, you would do an EIS. It would take about a year, maybe. You would get public input. It was maybe 100 pages. OK? The process worked. People were engaged. It didn't bog down things, and you would have a couple of hundred pages that the average American could read and then you would build, which is what we all want to do in a responsible way.

Fast forward to today. NEPA has been completely abused. This is a huge passion of mine because it hurts everybody. Too many people, too many Americans now know the numbers: 4 to 6 years on average to complete any EIS in America. Most cost millions of dollars. Most EISes are thousands of pages so no one reads them. How can you read them? And it is undeniably killing our ability to build infrastructure.

The only people, in my view, who really like this new system are, A, radical far-left environmental groups that don't want to build anything—OK, that is a group; it is not a big group in America, but, unfortunately, they have a loud voice—and probably the Chinese Communist Party. When they know they have to compete against us, they love the fact that it takes 9 to 10 years to permit a bridge in the U.S.A.

Let me provide some examples. GAO did a study quite a while ago on new highway construction to build and design a new highway, 9 to 19 years, on average, in America. It is about 8 years, I think, for Federal permits to permit a bridge—a bridge—in America.

The Gross Reservoir in Colorado, which is going to offer clean water to the people of that State, it has been two decades—20 years—to permit that important infrastructure project.

The California bullet train project—holy cow—approved in the nineties and still not built. The Mountain Valley Pipeline in Virginia and West Virginia, it began in 2015 with 20 miles left to complete. I hate to say it. It will never be completed—litigation, back to the courts, NEPA, radical enviros stopping it. This is not America. This is not the way it should work.

My State, unfortunately, has been the epicenter of groups that try to stop any resource development projects—

any projects—a road, a bridge, a gold mine. The Kensington Mine in Alaska now employs over 400 people, average wage \$110,000 per year. That is great money. It took almost 20 years to permit if you include the litigation—20 years. Who is that benefiting?

I worked with the Trump administration on their NEPA Executive order. I worked in the Environment and Public Works Committee on this infrastructure bill that President Biden supported. We got good—not great—but we got some pretty darn good permitting reform, based on some of what we did in the Trump administration, to bring projects to be able to build in a timely, efficient manner, not cutting corners. There is one Federal Agency in charge of decision, time limits on NEPA requirements to 2 years, limitations on pages for NEPA. These are common-sense reforms. We got them into law. OK. That is pretty good. Bipartisan. The President hailed this as one of his big signature achievements. I voted for it, in part, because of NEPA reforms, because of permitting reforms.

What am I upset about? About 4 months ago, the Biden administration's Council on Environmental Quality not only revised the Trump Executive order on permitting, which the average American Republican and Democrat thought was good—they actually undertook new regulations for NEPA that are clearly—clearly—intended to make it harder to permit infrastructure projects, particularly energy infrastructure projects.

Just ask anyone. Go look at the regs. Go look at what they put out. What I find remarkable is that the President let this come out of his White House. He is supposedly “Mr. Infrastructure,” “Mr. Building Trades,” “Mr. Joe Six-Pack Union Guy.”

This is a product of the radical, elite, coastal Democratic special interests that is going to make it harder to build things. That is a fact. It is a sad fact, especially because a lot of us came together as Democrats and Republicans to pass permitting reform.

So what did I file yesterday? A Congressional Review Act resolution says that if Congress doesn't like a big regulation coming out of the executive branch, we can vote to rescind it. We can vote to rescind it. So, yesterday, I filed one of those resolutions targeting this new rule from the Biden administration meant to slow down the building of infrastructure.

Here is the thing. You don't see this a lot, but every single Republican Senator is a cosponsor of my resolution—50—50 cosponsors of our Congressional Review Act resolution on infrastructure.

The other good thing about the CRA law, Congressional Review Act law, it is a privileged resolution. What does that mean? It means Majority Leader SCHUMER, even if he doesn't like it, has to take it up.

Here is the other thing. Under the CRA law, you only need 51 Senators 51

Senators to make it pass the Senate. So my Democratic colleagues are going to have a tough choice here. I don't think it should be tough. I think it should be 100 to 0. If you want infrastructure for America and you want to stand with the men and women who build things in America, then you are going to vote for my resolution. Simple.

Let me quote the Laborers' International, LIUNA, the biggest construction trade union in America, led by a great American, Terry O'Sullivan. When the Biden administration was putting out their NEPA rule, the laborers said: What are you doing? Here is our statement. Here is what they thought about that rule:

Once again, communities in need of vital infrastructure and the hard working men and women who build America will be waiting as project details for infrastructure are subjected to onerous reviews [by these new rules].

That is the Laborers'. Those are the men and women who build America. Americans will continue to bear the expense of NEPA-related delays, which cost taxpayers millions of dollars annually.

Lengthy review processes and unpredictable legal challenges which will result from these new regs will have a chilling impact on private investment and infrastructure.

That is what the Laborers' said.

This is going to be an interesting vote because I have said this a number of times—I think some of my Democratic friends have gotten a little upset with me, but I think it is a fact; it is certainly a fact in Alaska—whenever the national Democrats have a choice between the radical far-left environmentalists, the coastal elites, and the men and women who build things and made our country great, they always choose the radical environmentalists. I mentioned this in the Commerce Committee hearing the other day. Some of my colleagues got a little upset with me. I said: All right. Guess what I am going to have—a CRA. I am going to put it on the floor, and it is going to be a test vote. I know where 50 Republicans stand. We are going to stand with the men and women who build stuff. If you support my CRA like the Laborers' do or will, the resolution, you are going to support it. If you support infrastructure for America, you are going to support our resolution. If you support energy for America, you are going to support our resolution. If you support the men and women who actually build stuff in this country, good wages, you are going to support my resolution. If you stand with the coastal environmental elites who want to shut down this country, you will vote against it.

I think it is going to be really interesting to see what the men and women of the U.S. Senate stand for: far-left environmentalists who just want to stop anything and shut it all down or the men or women who build stuff?

That vote is going to come in the next few weeks, and I am going to be down here on the floor a lot talking about it. I hope my colleagues do the right thing because we all know what the right thing to do is: to move this country forward, to build on the infrastructure bill, and to get working and support the men and women who do that hard work.

ENERGY

Mr. SULLIVAN. Madam President, I want to turn to energy now. You know the President is in Saudi Arabia. There is a lot of irony here, I believe, because his administration has clearly—clearly—made it harder for Americans to produce American energy with American workers, with American infrastructure. That is a fact. That is a fact, OK? I see it in Alaska every day—every single day. The Federal Government is trying to stop the production of American energy.

What are we seeing? Inflation, super high prices at the gas pump—literally, everything. Senior administration officials are going to Wall Street. Senior administration officials who are Federal regulators for finance are all trying to choke off capital to the American energy sector. It hurts my constituents. It hurts the country.

So the President is going to Saudi Arabia to beg them to produce more. He should send an envoy to Texas or an envoy to Alaska and say: Hey, how can we produce more here? How can we produce more here? I hope they are starting to change their tune. I hope they are starting to change their tune so that we don't need to beg the Saudis, dictators like Iran and Venezuela, and all these other autocratic regimes in the world to produce. We should produce it in our country. We have the highest standards in the world by far on the environment—by far. It is not even close. We have high standards of labor in the world.

The Biden administration, in my State, has been a disaster. They have issued 26 Executive orders or Executive actions solely focused on my State, solely focused on Alaska, none of which has been helpful.

Lately—lately—there has been discussion, constructive discussion, on a big project in Alaska called the Willow Project. The Biden administration is showing signs that they want to support it. That would make sense. The country needs energy. This would be done in the National Petroleum Reserve in Alaska set aside decades ago by Congress for oil and gas development—again, the highest standards in the world. I pitched the President on this project over a year ago in the Oval Office. By the way, it has some of the lowest emissions in the world of any big energy project. I am going to talk about who supports it.

This has been in permitting for years. I won't go through the timeline, but this project, the Willow Project,

has been in permitting for years. We could start building it this winter. As a matter of fact, we tried to start building it last winter.

Like I said, I pitched the President on this: 2,000 construction jobs; enormous support from the building trades, labor unions; lowest greenhouse gas emissions for a project this type and size in America. And it would help us not have to go beg from other countries.

But there has been a lot of press in the last week on the Willow Project. Of course, our mainstream media doesn't get it. They love to tell their kind of slanted story on the Willow Project, so I am going to push back. And, boy, if you are a reporter, I really hope you write down some of the stuff that I am going to talk about here because it is all factual. And with all due respect, most of you guys never write about these things.

I am going to start with this chart. This is a really important chart in my mind, and it is important because this chart goes to an issue that really, really strikes to the heart and soul of why resource development in my State in particular is so important.

This chart is from the American Medical Association, and it looks at life expectancy from 1980 to 2014: 25 years. And in different parts of America, you see different life expectancy in these different colors. The blue, darker blue-purple is areas where life expectancy has increased dramatically in the last 25 years.

Unfortunately, there is yellow, orange, and even red. Life expectancy has slowed or even decreased in a few places. If you look at the map, that is mostly due to the horrendous opioid epidemic that we had as a nation.

But if you look at this chart, the one State where life expectancy has increased the most, by far, is the State of Alaska. The one area in the State of Alaska that has increased the most in terms of life expectancy are many of our rural areas: North Slope Borough, Northwest Arctic Borough, Aleutian Island chain—13 years, 13 years. In 25 years, people's life expectancy went up that much.

I have asked many times my Senate colleagues, Give me a policy indicator of success more important than are the people you representing living longer. Give me one. There isn't one. That is about as important as it gets.

And in my State, it has happened. It has happened. Why has it happened? Why has it happened? Well, I will tell you why it has happened. First, in a lot of these rural areas, unfortunately, the life expectancy in the early eighties was quite low.

These are primarily Alaskan Native communities, and they had some of the lowest life expectancies of any Americans—sometimes of any people in the world—because they didn't have things, like good jobs and flush toilets and clinics. They lived in real poverty. So we started really low.

And then what happened? What happened that in these mostly Alaskan Native communities people started living longer? I will tell you what happened. They started getting jobs. Resource development happened, responsible resource development: oil, gas, mining, fishing.

So when I talk about these issues, when Senator MURKOWSKI talks about these issues, it is not just some kind of pie-in-the-sky issue of oil and gas. I mean, this is about life and death, which is why I come down here a little bit riled up sometimes because people don't have a clue. People don't have a clue.

The radical enviros who try to shut down the economies of my State all the darned time and some U.S. Senators—primarily the senior Senator from New Mexico—who come down here and try to shut this down, they don't understand.

So people are living longer in Alaska, much longer, more than any other part of the country because we have had responsible resource development, which brings me back to Willow.

So, again, you will see all these articles in the Washington Post, all these stories. Heck, there is three this week, I think, about this one project. And they are all slanted. And you have got some Lower 48 environmental group in New York City or San Francisco—oh my gosh, climate bomb—all this rhetoric that is hot air—pardon the pun—but not accurate. Who is supporting this project? Who is supporting?

You have an incredible diversity of people supporting this project. First, the unions, every major union in America—building trades, AFL-CIO—they are all supporting this project. They are all supporting this project.

But what I really want to emphasize is another group that is very special to me that supports the Willow Project. And you see here some of the symbols of these groups right here.

Some are the Alaska Chamber, Oil and Gas Association, Resource Development Council, but most of these symbols here are the Alaskan Native people—the Alaskan Native people, the leaders of a really important constituency in Alaska, the First Peoples of Alaska.

Why am I saying this? Because our national media never talks about this, right? They will pick one group, one leader—oh, we are against it—so they write about it. That is baloney.

The leaders of the Alaska communities, the Native communities are overwhelmingly supportive of this project. And here is my point: This administration loves to talk about environmental justice, environmental equity, communities that have been discriminated against to make sure they have access to proper environment, but you know what they do? They have been doing it for a year-and-a-half. When they talk about environmental justice, environmental equity, they always forget about Alaskan Natives.
